

المرحلة: اجازة	المادة: Web Design (OPEN BOOK)
المدة: ساعتان	السنة المنهجية: الثانية
الدورة الأولى	الاستاذ: د. نادين زيب

**Exercise I:** Write the html code of the following page [40 pts]  
Use Java Script to submit all information of this form in new window

### Taxi Reservation Form

Contact information

Name:

E-mail:

Address:

Telephone number:

Which taxi do you require?

Car  Van  Tuk Tuk

Extras

Baby Seat  Wheelchair Access  Stock Tip

Billing information

Name On Credit Card:

Credit Card Number:

Credit Card Type:

Expiration Date:

### Exercise II: [40pts]

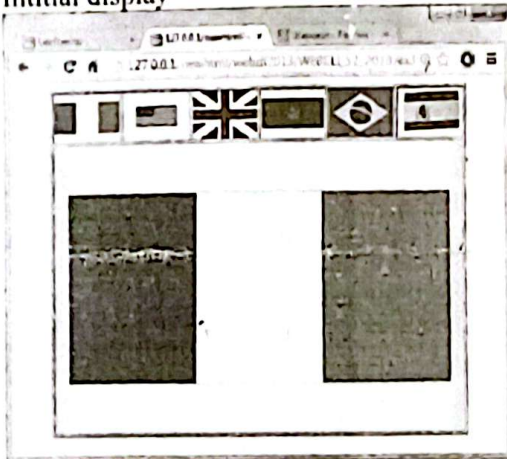

Given the following script in which it defines an array containing the names of 6 photos exist on the same directory as the script:

```
<head><script>
var ph = new Array("fr.jpg","us.jpg","en.jpg","maroc.jpg"."brasil.jpg"."spain.jpg");
</script></head>
<body><script></script> </body>
```

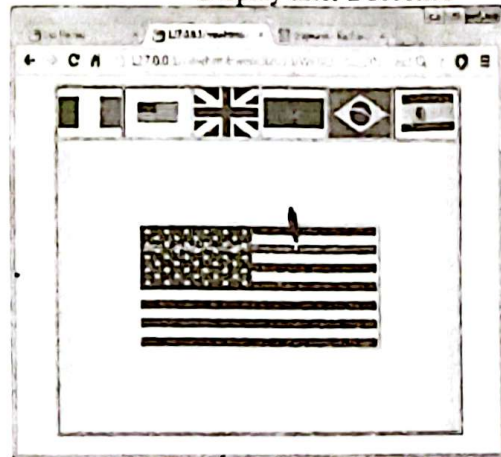

Complete this script to get the following display:

- The pictures are displayed on a row of a table. We take the size 50x75
- On another line we will print the first photo taking the full width of the table.
- A timer is started. Every two seconds, the display changes to the next picture (see example given after 2 seconds).
- When the last photo is reached, it returns to the first.

Initial display

Display after 2 seconds

### Exercise II: (20 points)

We want to make a framset display:

The screen is divided in two vertical frames (25% - 75%).

On the left side, a menu is displayed. This menu has two options :

Exercise 1: click on this option, displays the script 'ex1.html' on the right side

Exercise 2 : click on this option, displays the script 'ex2.html' on the right side.

Initially the script 'ex1.html' is displayed on the right side.

Write the needed-scripts (except ex1.html and ex2.html already done in Exercise I and II).
